## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 5-15, 17, 20-31, 33, 37-44, and 46 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the steps of or means for **“determining, at said user node, a preferred bitstream of said signal from said distinct bitstreams”**, when the determining is considered within the specific combination of steps recited in the method of claim 5. The prior art of record fails to teach or make obvious the steps of or means for **“adjusting, at said each of said receiver nodes, a transmit time and a transmit frequency of said signal in response to said time shift parameter and said frequency shift parameter to facilitate constructive combining of said signal from said each of said receiver nodes at said extra-network location”**, when the adjusting is considered within the specific combination of steps recited in the method of claims 17 and 33. The prior art of record fails to teach or make obvious the steps of or means for **“implementing, at said each node, said configuration information to enable said extra network communication utilizing a narrowband channel defined by said chosen RF capability”**, when the implementing is considered within the specific combination of steps recited in the method of claim 20. The prior art of record fails to teach or make obvious the steps of or means for **“engaging in communication over said first narrowband channel at said first node to carry a second signal between said first node and a second extra-network location”**, when the engaging is considered within the specific combination of steps

recited in the method of claim 21. The prior art of record fails to teach or make obvious the steps of or means for **“selecting, for a third one of said nodes, said second RF capability defining said second narrowband channel for said extra-network communication”**, when the selecting is considered within the specific combination of steps recited in the method of claim 22. The prior art of record fails to teach or make obvious the steps of or means for **“control processing section selectively converting said information spectrum received at said first transceiver over said narrowband channel to said distinct bitstream prior to forwarding said distinct bitstream over said wideband backbone”**, when such control is considered within the specific structure recited in the device of claim 37. The prior art of record fails to teach or make obvious the steps of or means for **“control processing section determines a preferred bitstream of said signal from said multiple distinct bitstreams and presents said preferred bitstream to a destination”**, when such control is considered within the specific structure recited in the device of claims 38 and 42. The prior art of record fails to teach or make obvious the steps of or means for **“second node determines a preferred bitstream from said first and third bitstreams, and said second node presents said preferred bitstream to a destination”**, when such node is considered within the specific structure recited in the device of claim 46.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
